

Project title: INTELLIGENT EXAM PROCTORING LOGIC

Team members:

1. Bathula Neha 2520090013
2. Matti Avishya 2520030482
3. Geriganti Varshini 2520030017

The Intelligent Exam Proctoring Logic project is a web-based online examination monitoring system designed to ensure fairness, integrity, and transparency during remote assessments. With the increasing adoption of online education and remote examinations, preventing malpractice and maintaining exam credibility have become significant challenges. This project addresses these challenges by implementing intelligent proctoring mechanisms that monitor candidate behavior and detect suspicious activities during examinations.

The system goes beyond a traditional online quiz platform by integrating various proctoring features such as:

- Secure Login Authentication
- Full-Screen Enforcement

- Tab Switching Detection

- Copy-Paste Restriction

- Multiple Session Detection

- Inactivity Monitoring

- Suspicious Activity Logging

- Cheating Probability Score Generation

- Real-Time Alerts and Warnings

- Exam Timer Management
